Technical Standard:	EN ISO 13688:2013 EN 17092-4:2020	Protective clothing – general requirements Protective garments for motorcycle riders – Part 4: Class A garments - Requirements
Intended use:	Motorcycling: preventive use – correct fitting and positioning of the inner protectors is essential.	

EU Type Examination Certificate

Date: 2021/11/23

n. **775214701/OE**

Validity:
2026/11/22

Size range:	Men's commercial sizes: from XS to 5XL
Technical File:	DC-13748
Test report:	RCT n° 4012411/E
Functions and performance levels:	The garment offers limited protection against mechanical risks arising from impact and abrasion in case of a fall while participating in motorcycling activities.

This PPE item has reached the following performance:

Class A (*): Class A garments offer a minimum necessary degree of protection from impact and abrasion and are expected to have the least ergonomic and weight penalties.

(*) The Standard provides different classes of protection for garments including protectors/shells: AAA (highest class), AA (middle class) and A (lowest class); class B is for garments not including protectors / shells = just abrasion protection; class C is for impact protector ensemble garments.

NOTES: the protection provided also depends on the correct fit of the garment; the CE-Certified incorporated impact protectors provide strengthened protection and must be kept in their place: this falls within the responsibility of the user.

Marking:	printed on different labels, including the following information: - CE Marking ; - brand and name of the Manufacturer; - item designation; - pictogram indicating intended use (motorcycling) + nr/year of the Technical Standard of reference + indication of the class of protection achieved; - pictogram inviting to read the User Manual; - on other different labels: "Made in...", material composition, size label, care and washing instructions etc.
