Technical Standard: **EN ISO 13688:2013** Protective clothing – general requirements
EN 17092-4:2020 Protective garments for motorcycle riders – Part 4: Class A garments – Requirements

Intended use: Motorcycling: preventive use – correct fitting and positioning of the inner protections are essential.

EU Type Examination Certificate

Date: 2022/06/06

n. **77522302/OE**

Validity: 2027/06/05

Size range:	LADIES' sizes: from XS to 5XL
Technical File:	DC-15107
Test report:	RCT n°4111429.01/E
Functions and performance levels:	The garment offers limited protection against mechanical risks arising from impact and abrasion in case of a fall while participating in motorcycling activities. This PPE item has reached the following performance: Class A^(*): Class A garments offer a minimum necessary degree of protection from impact and abrasion and are expected to have the least ergonomic and weight penalties. (*): The Standard provides different classes of protection for garments including protectors/shells: AAA (highest class), AA (middle class) and A (lowest class); class B is for garments not including protectors / shells = just abrasion protection; class C is for impact protector ensemble garments. NOTES: the protection provided also depends on the correct fit of the garment; the CE-Certified incorporated impact protectors provide strengthened protection and must be kept in their place: this falls within the responsibility of the user.
Marking:	Printed on stitched labels and displaying the following information: - CE Marking; - brand and name of the Manufacturer; - item designation; - pictogram indicating intended use (motorcycling) + nr/year of the Technical Standard of reference + indication of the class of protection achieved; - pictogram inviting to read the User Manual; - on other different labels: "Made in...", material composition, size label, care and washing instructions etc.
