**Protective functions:** The garment offers limited protection against mechanical risks arising from impact and abrasion in case of a fall while participating in motorcycling activities: CE-Certified incorporated impact protectors provide strengthened protection.

**Typical test results obtained:** This PPE item has reached the following performance:  
**Class A (\*)** = light-duty protective garments: the third highest level of protection.  
EN 17092-4 garments are expected to have the least ergonomic and weight penalties.  
(see also Test Report) Protective function is linked to the correct fit of the garment - also the inner impact protectors must be kept in their place: this falls within the responsibility of the user.

(\*) = The applied Technical Draft document currently provides different levels of protection for garments including protectors/shells: from class AAA (highest level of performance) to class AA (medium level) to class A (lower level); - class B for garments not including protectors / shells = just abrasion protection; - class C for Impact protector ensemble garments.

**Marking:** printed on a label, including the following information:

- **CE Marking;**
- Brand (= LS2) and legal Name of the Manufacturer;
- designation (commercial name - unique, unambiguous) of the P.P.E;
- pictogram indicating intended use (motorcycling) + nr/year of the Technical Draft of reference + indication of the performance reached at laboratory test (Class A);
- pictogram about ergonomic measures (commercial sizes on a second label);
- pictogram inviting the user to read the User Manual;
- on different labels: "Made in...", sizing etc.
